Snowflake CLI Invalid connection configuration. 250001: 250001: Could not connect to Snowflake backend after 2 attempt(s)

[Ask Question](#)

Asked today Modified today Viewed 2 times

I am trying to run `snow git execute` `@advanced_data_engineering_snowflake/branches/main/forums-analyses/pipeline/data/load_forums_data.sql -D "env='STAGING'" --database=COURSE_REPO --schema=PUBLIC` through a github remote repository that is integrated with my snowflake account

when I ran this I got a `Connection default is not configured` error however when I finally set my `default_connection_name` in my `config.toml` file to:

```
"data_eng_devops_with_snowflake"
= false
ueva\\.snowflake\\logs"

file to:

flake]
8"
"
```

the error went away but when I ran `snow git execute @advanced_data_engineering_snowflake/branches/main/forums-analyses/pipeline/data/load_forums_data.sql -D "env='STAGING'" --database=COURSE_REPO --schema=PUBLIC` again it I got:

 Copy

Invalid connection configuration. 250001: 250001: Could not co

So I tested again with `snow connections test` and even `snow connection test --connection data_eng_devops_with_snowflake` but to no avail it keeps showing the same error.

When I run `snow connection list` it seems to give my connection list but I don't know if this has something to do with the error:

```
C:\Users\larry.cueva\Documents\scripts\advanced-data-engineering-snowflake>snow connection list
Reading connections from C:\Users\larry.cueva\.snowflake\connections.toml. Entries from config.toml are ignored.
+-----+-----+-----+
| connection_name | parameters | is_default |
+-----+-----+-----+
| [REDACTED] | {'account': '[REDACTED]', 'user': '[REDACTED]', 'authenticator': 'externalbrowserconnections.ser'} | False |
| data_eng_devops_with_snowflake | {'account': 'BA[REDACTED]HS-BAE[REDACTED]58', 'user': '[REDACTED]', 'password': '****', 'role': 'ACCOUNTADMIN', 'authenticator': 'snowflake'} | True |
| test | {'account': 'test-test', 'user': 'test', 'password': '****', 'database': 'test', 'schema': 'test', 'warehouse': 'test', 'role': 'accountadmin'} | False |
+-----+-----+-----+
```

I don't know what I'm doing wrong, I know from the `account` variable I must use my snowflake organization name and account name.

I even deleted the cache in the `~/.snowflake/` directory where the `.toml` 's are located but the error still doesn't budge.

How do I freakin get rid of this error. I've been at it for 3 hours

`git` `error-handling` `command-line` `snowflake-cloud-data-platform`
